

Interest form ZonMus project

v1/13juni25

The ZonMus postal code solar project:

- The project is being built in PC 1223; people who live there (or have an SME), or in one of the adjacent postcodes can participate. In total, more than 17,000 households are eligible to participate.
- The solar installation will have a capacity of more than 417,000 Wp. We will divide this into solar panel portions (shares) of 300 Wp. This will keep the entry threshold as low as possible. There are almost 1,400 solar shares available to register for.
- The current offer for participants is as follows:
 - A share of 300 Wp in this installation will yield 255 kWh of solar power per year.
 - The investment per share is – as we calculate it now – 260 euros, one-off.
 - Per kWh that each share generates, the compensation is – expectedly – around 8.8 cents per year. Per share/per year, that is 26.40 euros, and over the entire term (15 years) around 450 euros.

And: participation is also good for the climate: Each generated kWh of solar power saves 600 grams of emissions per year. Per share of 300 Wp, that saves more than 150 kg of CO2 emissions per year; that is more than 2 tons of CO2 savings over the project period of 15 years.

I am interested!

If you are interested (without having to commit now), please indicate this below. You do this by stating your name and address details and indicating for how many shares you would possibly like to participate. This will give us an idea of the interest that there is now.

First name	Last name
Adress/house number	Postal code
Email	Tel number
I would be interested to participate, and for the number of shares of 300 Wp	

Follow-up: information meeting

As a follow-up step, we invite everyone who is interested to an explanatory meeting. You can ask all your further questions there. And then the final offer will be available and you will know exactly what you are signing up for. At that moment you can decide whether to participate.

I want to help too!

We are now busy further shaping the project and recruiting the required number of participants. We could use some help with that!

Want to help make this project a success?	Yes, you can contact me about this	No, rather not
